Series Name: Law Enforcement Management and Administrative Statistics (LEMAS) Series

Series Information: This survey presents information on three types of general purpose law enforcement agencies: state police, local police, and sheriff's departments. Data from the primary state police agency in each of 49 states (Hawaii does not have a state police agency) are also presented. Variables include size of the populations served by the typical police or sheriff's department, levels of employment and spending, various functions of the department, average salary levels for uniformed officers, and other matters relating to management and personnel.

Abstract

Every 3 to 4 years, the Bureau of Justice Statistics (BJS) surveys a nationally representative sample of state and local law enforcement agencies. The surveys are conducted as part of the Law Enforcement Management and Administrative Statistics (LEMAS) program. Data include agency personnel, expenditures and pay, operations, community policing initiatives, equipment, computers and information systems, and written policies. The LEMAS survey has been conducted in 1987, 1990, 1993, 1997, 1999 (limited scope), 2000, 2003, and 2007.

Summary Data Description

Time Period:	2007 - 2008
Date(s) of Collection:	December, 2007 - Decemberr, 2008

Geographic Coverage:	United States
Geographic Unit:	City
Unit of Analysis:	Police agencies
Universe:	Publicly funded State and local law enforcement agencies in the United States in 2007
Kind of Data:	Survey data

Methodology and Processing

Data Collection Methodology

Time Method:	Cross-section
Sampling Procedure:	<p>Based on employment data from the 2004 BJS Census of State and Local Law Enforcement Agencies (CSLLEA), the original 2007 LEMAS survey sample included 3,224 state and local law enforcement agencies. The sample was designed to be representative of all general purpose state and local law enforcement agencies in the United States, with separate samples drawn for local police departments and sheriffs' offices. Agencies serving special jurisdictions (such as schools, airports, or parks) or with special enforcement responsibilities (such as hunting and fishing laws or alcohol laws) were considered out of scope for the survey.</p> <p>Sheriffs' enforcement without primary law enforcement jurisdiction were also considered out of scope for the survey. In addition, some smaller local police departments were determined to have closed since the 2004 CSLLEA and were dropped from the sample. After all out-of-scope and closed agencies were dropped, the final sample size for the survey was 3,095.</p> <p>The final sample included 950 self-representing (SR) agencies with 100 or more sworn personnel, and 2,145 nonself-representing (NSR) agencies employing fewer than 100 sworn personnel.</p> <p>The SR agencies included 591 local police departments, 310 sheriffs' agencies and 49 state law enforcement agencies. All 950 SR agencies received the 49-item CJ-44L questionnaire.</p> <p>The NSR local police agencies were selected using a stratified random sample with cells based on the number of sworn personnel. The NSR sheriffs' offices were selected using a simple random sample. Overall, the NSR sample included 1,504 local police departments and 641 sheriffs offices. All 2,145 NSR agencies received the 40-item CJ-44S questionnaire.</p>

- Study 31161 -

Mode of Data Collection:	mailed questionnaires
Actions to Minimize Losses:	<p>When an agency did not supply a response to a numeric item, median value imputation or ratio imputation was used. The median value imputations used the median value of an item reported in the 2007 survey by other agencies in the same sample cell. The ratio imputations used the median value of a ratio reported in the 2007 survey by other agencies in the same sample cell. Imputations were not used for categorical items.</p> <p>For race and gender data, a cold-deck imputation process was used where the percentages represented in an agency's sworn personnel totals by each racial/ethnic or gender group in the 2003 LEMAS survey were applied to the 2007 sworn personnel totals. If 2003 data were not available, then a ratio imputation method was used.</p>
Weighting:	<p>The base weight for all SR agencies is one. For NSR sheriffs' offices, the base weight is 4.22. For NSR local police departments, the base weights are determined by the number of sworn personnel employed as reported in the 2004 BJS Census of State and Local Law Enforcement Agencies. The final weight associated with every agency, both SR and NSR, is the product of the base weight, a factor that adjusted for changes in the universe since 2004, and a factor that adjusted for any nonresponding agencies in each cell. For state law enforcement agencies, the final weight is 1.09. For SR sheriffs' offices it is 1.12, and for NSR sheriffs' offices it is 4.90.</p> <p>The final weight for all SR local police departments is 1.06. For NSR local police departments with 63 to 99 officers, the final weight is 2.22, with 40 to 62 officers, 3.54; with 24 to 39 officers, 5.21; with 14 to 23 officers, 7.55; with 7 to 13 officers, 10.97; and for departments with fewer than 7 officers the final weight is 20.29.</p> <p>To compute the officer-based percentages for the final report, the final weight for an agency was multiplied by the proportion of all full-time equivalent sworn officers employed by that agency. The number of full-time equivalent sworn officers was defined as the sum of the number of full-time sworn officers and one-half the number of part-time sworn officers.</p> <p>In the final phase of the data collection, all remaining non-respondents were given the opportunity to complete an abbreviated questionnaire consisting of the first page of the original survey form they received. A total of 21 local police departments (5 SR and 16 NSR) and 14 sheriffs' offices (0 SR and 14 NSR) completed the abbreviated form. For analysis of the data that includes these partial-form responses, slightly different weights must be used.</p> <p>The adjusted partial-form weight for all SR local police departments is 1.05. For NSR agencies with 63 to 99 officers, the partial form weight is 2.21; with 40 to 62 officers, 3.49; with 24 to 39 officers, 5.15; with 14 to 23 officers, 7.48; with 7 to 13 officers, 10.80; and for departments with fewer than 7 officers, the partial-form weight is 20.04. For NSR sheriffs' offices the adjusted partial-form weight is 4.78.</p>

Data Appraisal Information

Response Rate:	A total of 2,840 agencies completed their LEMAS questionnaire for an over-all response rate of 91.8%. This included 879 SR agencies (92.5%) and 1,961 NSR agencies (91.4%). The response rate for local police departments was 93.9%; for sheriffs' offices it was 87.0%; and for state law enforcement agencies it was 91.8%. The final database includes full responses from 1,968 local police departments, 827 sheriffs' offices, and 45 state agencies. An additional 21 local police departments and 14 sheriffs' offices completed the first page of the questionnaire as part of a final non-response follow-up effort.

Estimates of Sampling Error:	<p>The accuracy of the estimates presented in the final report depends on two types of error: sampling and nonsampling. Sampling error is the variation that may occur by chance because a sample rather than a complete enumeration of the population was conducted. Nonsampling error can be attributed to many sources such as the inability to obtain information about all cases in the sample, inability to obtain complete and correct information from the administrative records, and processing errors. In any survey the full extent of the nonsampling error is never known.</p> <p>The sampling error, as measured by an estimated standard error, varies by the size of the estimate and the size of the base population. Estimates of the standard errors have been calculated for the 2007 survey. These estimates may be used to construct confidence intervals around percentages in this report. For example, the 95%-confidence interval around the percentage of local police departments using foot patrol is approximately 55% plus or minus 1.96 times 1.5% (or 52% to 58%).</p> <p>These standard errors may also be used to test the significance of the difference between two sample statistics by pooling the standard errors of the two sample estimates. For example, the standard error of the difference between departments serving fewer than 2,500 residents and those serving 2,500 to 9,999 residents for enhanced 9-1-1 would be 3.5% (or the square root of the sum of the squared standard errors for each group). The 95%-confidence interval around the difference would be 1.96 times 3.5% (or 6.9%). Since the difference of 10% (75% minus 65%) is greater than 6.9%, the difference would be considered statistically significant. Standard error estimates may also be used to construct confidence intervals around numeric variables such as personnel counts. For example, the 95%-confidence interval around the number of full-time sworn personnel is approximately 463,147 plus or minus 1.96 times 10,265, or 443,028 to 483,266.</p>

Variable Description

Summary statistics (minimum, maximum, mean, median, and standard deviation) may not be available for every variable in the codebook. Conversely, a listing of frequencies in table format may not be present for every variable in the codebook either. However, all variables in the dataset are present and display sufficient information about each variable. These decisions are made intentionally and are at the discretion of the archive producing this codebook.

FORM CJ-44L
2007 SURVEY OF STATE AND LOCAL LAW
ENFORCEMENT AGENCIES
Law Enforcement Management and Administrative Statistics
U.S. Department of Justice, Bureau of Justice Statistics

IMPORTANT: Please read the instructions below prior to completing this questionnaire.

- There are three ways to submit this survey:
 - 1) Complete the survey online at <http://survey.policeforum.org/LEMASCI44L.pdf>
If you choose to complete the survey via the Internet, you will be prompted to enter your USER NAME and PASSWORD, which are included on the cover letter accompanying this questionnaire. You will also have to enter your ID NUMBER on the first page of the survey, which is located at the top right of this page. Without entering your agency's USER NAME, PASSWORD, and ID NUMBER, you will not be able to complete the survey online. The USER NAME and PASSWORD provide a secure location to submit your survey.
 - 2) Mail the survey to PERF using the enclosed postage-paid envelope.
 - 3) Fax the survey to PERF at 202-466-7826.
- Please retain a copy of the completed survey for your records.
- Please use either blue or black ink and print as neatly as possible using only CAPITAL letters.
- Do not leave any items blank.
 - If the answer to a question is not available or is unknown, write "DK" (don't know) in the space provided.
 - If the question is not applicable, write "NA" in the space provided.
 - If the answer to a question is none or zero, write "0" in the space provided.
 - When exact numeric answers are not available, provide estimates.
- Unless otherwise noted, please answer all questions using September 30, 2007, as a reference.
- If you have any questions or need assistance in completing the questionnaire, please contact Bruce Kubu of the Police Executive Research Forum (PERF) by phone at 202-454-8308 or by email at bkubu@policeforum.org. If you have general comments or suggestions for improving the survey, please contact Brian Reaves of the Bureau of Justice Statistics by phone at 202-616-3287 or by email at Brian.Reaves@usdoj.gov.

Burden Statement

Federal agencies may not conduct or sponsor an information collection, and a person is not required to respond to a collection of information, unless it displays a currently valid OMB Control Number. Public reporting burden for this collection of information is estimated to average three hours per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate, or any other aspects of this collection of information, including suggestions for reducing this burden, to the Director, Bureau of Justice Statistics, 810 Seventh Street, NW, Washington, DC 20531. The Omnibus Crime Control and Safe Streets Act of 1968, as amended (42 USC 3732), authorizes this information collection. Although this survey is voluntary, we urgently need your cooperation to make the results comprehensive, accurate, and timely. We greatly appreciate your assistance.

Burden Statement

Federal agencies may not conduct or sponsor an information collection, and a person is not required to respond to a collection of information, unless it displays a currently valid OMB Control Number. Public reporting burden for this collection of information is estimated to average three hours per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate, or any other aspects of this collection of information, including suggestions for reducing this burden, to the Director, Bureau of Justice Statistics, 810 Seventh Street, NW, Washington, DC 20531. The Omnibus Crime Control and Safe Streets Act of 1968, as amended (42 USC 3732), authorizes this information collection. Although this survey is voluntary, we urgently need your cooperation to make the results comprehensive, accurate, and timely. We greatly appreciate your assistance.
