Terms of Use

Bibliographic Citation:

Publications based on ICPSR data collections should acknowledge those sources by means of bibliographic citations. To ensure that such source attributions are captured for social science bibliographic utilities, citations must appear in footnotes or in the reference section of publications. The bibliographic citation for this data collection is:

U.S. Dept. of Justice, Bureau of Justice Statistics. LAW ENFORCEMENT AGENCY IDENTIFIERS CROSSWALK [UNITED STATES], 2000 [Computer file]. ICPSR ed. Ann Arbor, MI: Inter-university Consortium for Political and Social Research [producer and distributor], 2004.

Request for Information on Use of ICPSR Resources:

To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about ICPSR participants' research activities, users of ICPSR data are requested to send to ICPSR bibliographic citations for each completed manuscript or thesis abstract. Visit the ICPSR Web site for more information on submitting citations.

Data Disclaimer:

The original collector of the data, ICPSR, and the relevant funding agency bear no responsibility for uses of this collection or for interpretations or inferences based upon such uses.

Responsible Use Statement:

In preparing data for public release, ICPSR performs a number of procedures to ensure that the identity of research subjects cannot be disclosed. Any intentional identification or disclosure of a person or establishment violates the assurances of confidentiality given to the providers of the information. Therefore, users of data obtained from the ICPSR archive and/or any of its special topic archives agree:

- To use these datasets solely for statistical analysis and reporting of aggregated information, and not for investigation of specific individuals or organizations, except when identification is authorized in writing by ICPSR
- To make no use of the identity of any person or establishment discovered inadvertently, and to advise ICPSR of any such discovery
- To produce no links among ICPSR datasets or among ICPSR data and other datasets that could identify individuals or organizations

Redistribution:

ICPSR data may not be redistributed or sold to other individuals, institutions, or organizations without the written agreement of ICPSR.

INTRODUCTION

The crosswalk file is designed to provide geographic and other identification information for each record included in either the Federal Bureau of Investigation's Uniform Crime Reporting (UCR) Program files or in the Bureau of Justice Statistics's Census of State and Local Law Enforcement Agencies (CSLLEA). The main variables each record contains are the alpha state code, county name, place name, government agency name, police agency name, government identification number, Federal Information Processing Standards (FIPS) state, county, and place codes, and ORI code. These variables allow a researcher to take agency-level data, combine it with Bureau of the Census and BJS data, and perform place-level and government-level analyses.

SOURCE DATA

Six primary sources of data were used in compiling the 2000 crosswalk file:

- 1) Files supplied by the FBI contained, of most importance, ORI numbers, agency names, and UCR state and county codes. Mailing address information for most agencies was also included.
- 2) The Census of State and Local Law Enforcement Agencies (CSLLEA), 2000: [United States] (ICPSR 3484) was funded by BJS to provide an enumeration of State and local police agencies in the United States. The universe for the CSLLEA is all police and sheriffs' departments that were publicly funded and employed at least one full-time or part-time sworn officer with general arrest powers. The date of that file 2000 is the date for the current crosswalk file.
- 3) A custom version of the Governments Integrated Directory (GID) was supplied by the Census Bureau. The file lists all local governments as defined by the Census Bureau for general statistical purposes counties, cities, townships, special districts, and independent school districts.
- 4) The FIPS 55 file contains codes for named populated places, primary county divisions, and other locational entities of the United States, Puerto Rico, and the outlying areas. It was particularly valuable for determining place codes for unincorporated places, airports, and Indian reservations. As of June 1, 2004 it was available at this Web site: http://geonames.usgs.gov/fips55/fips55down.html
- 5) Census Bureau gazetteer files for 2000 were used to add latitude, longitude, population, area in square miles, and total housing units to the records. These files were available at the Census Bureau's Web site, http://www.census.gov/geo/www/gazetteer/places2k.html, as of June 1, 2004.

6) The 1996 version of the crosswalk file was the base for creating the 2000 version.

CORE VARIABLES

Given the number of sources of data used in compiling the crosswalk file, there are many variables which are blank for certain records. However, certain variables are important enough that an attempt has been made, and will continue to be made, to ascertain complete information for them. These variables are:

STATE Alpha State Code County Name COUNTY PLACENM Place Name GOVNAME Government Name Agency Name AGENCY Government ID **GOVID FSTATE** FIPS State Code **FCOUNTY** FIPS County Code **FPLACE** FIPS Place code

Some of these variables currently have values of 9fill or Undetermined. ICPSR will continue to try and ascertain valid values for them in the future. The remaining variables will have missing data based on the source of the record and the completeness of the original data. For example, records that are only found in the CSLLEA 2000 will have no values for the UCR state, county, population group, or other UCR specific variables.

SPECIAL SITUATIONS

State Police

The crosswalk file contains both state police headquarters and branch locations. The government ID for all state police agencies is that of their state governments. The FIPS codes listed for branches of the state police are based on the area that the branch covers. For example, the Michigan State Police - Washtenaw County (ORI: MI81081) is assigned the State of Michigan's Governments ID and the FIPS place code of Washtenaw County. In other instances a state police branch may be assigned to a city. In these cases the city place code is used. Often the agency's name indicates the geographic area that it covers. Headquarters have been assigned FIPS county and place codes of 980 and 98000 respectively. For headquarters locations, the variable HQCODE contains the actual FIPS county and place code of the headquarters location. Analysts may wish to treat these records differently from others.

Massachusetts Counties

Some Massachusetts county governments were abolished by the Massachusetts Legislature, and their functions were assigned to the State government. In the crosswalk file, those county sheriffs are coded as State agencies and carry the State of Massachusetts Governments Division ID. This may have implications in historical crime analysis, and researchers may want to change the government type variable (GOVTYPE) back to county to suit their specific purposes. The following are the affected county areas:

Area	Abolished Effective
Berkshire County government	7/1/99
Essex County government	7/1/99
Franklin County government	7/1/97
Hampden County government	7/1/98
Hampshire County government	7/1/99
Middlesex County government	7/1/98
Worcester County government	7/1/98

Colleges and Universities

Many colleges and universities, both public and private, have their own police departments. Often the names of these agencies do not fully indicate the geographic area they serve. In addition, these agencies typically cover a geographic area that is more specific than the FIPS place code represents. For example, the University of Michigan Department of Public Safety covers the campus of the University of Michigan located in Ann Arbor, Michigan. The place code for the city of Ann Arbor was assigned to this agency. Often the location of the university can be determined from its mailing address. With multi-branch campuses it is not always possible to determine the location from the address. In these cases the FIPS place variable will be coded 9fill. College and university police provide an example of a general rule used in creating the crosswalk file: agencies were linked to FIPS place codes as specifically as possible without being overly specific (e.g., the U of M DPS is located within Ann Arbor, Michigan, and there is no finer geographic detail available). The government IDs listed for these police agencies are the IDs of the government agencies that created them. For public colleges and universities, this may be the state, county, city, or special district government.

Airports

Some airports have their own FIPS place codes. Where this is the case, the specific place code for the airport is used. The variable Entity Part of Code (PARTOFCD) will usually

have a value as well. Airports that do not have their own place code are typically assigned the FIPS place code of the county that they are located in.

Independent School Districts

Several states have independent school districts which are considered to be local governments by the Census Bureau as distinguished from school districts which are dependent agencies of county governments. Some of these independent school districts have police agencies. These agencies were assigned the government ID of their parent government whenever possible. Furthermore, some colleges are considered to be independent school districts. They were assigned their parent government's ID. In many instances the parent government could not be identified but the government type was apparent and was coded accordingly.

Census Designated Places

Census Designated Places (CDPs) comprise densely settled concentrations of population that are identifiable by name, but are not legally incorporated places and hence are not considered to be governments. Their boundaries, which usually coincide with visible features or the boundary of an adjacent incorporated place, have no legal status, nor do these places have officials elected to serve traditional municipal functions (1990 Census of Population and Housing, Summary Tape File 3, Technical Documentation, December 1991). CDPs are not listed in the Governments Integrated Directory. For CDPs with police agencies, the FIPS place codes were found in the FIPS 55 file.

Indian Tribes

In many instances a FIPS place code exists for an Indian reservation. Where possible, specific FIPS place codes, as listed in the FIPS 55 file, were assigned to the tribal agencies serving those reservations. Otherwise the place code that was assigned is the county code or 9fill. Tribal agencies were assigned a government ID of 999999997.

Places "Part Of" Another Place and Other Names

The concept of a place, such as a city, being part of another entity such as a county is straight-forward. However, a place, with its own FIPS place code, may also be part of another place that also has its own unique FIPS place code. For example, South International Falls, MN is listed with its own place code. It also is listed as being part of International Falls, MN which has its own place code. On the record for South International Falls, MN, the PARTOFCD and PARTOFNM variables have the place code and name for International Falls; the FPLACE and PLACENM variables have the place code and name for South International Falls.

Similarly, Maggie Valley, NC is also referred to as just Maggie. There are different FIPS place codes for Maggie Valley and Maggie. On the record for Maggie Valley, NC, the OTHCODE and OTHNAME variables have the place code and name for Maggie; the FPLACE and PLACENM variables have the place code and name for Maggie Valley.

One of the main uses of the crosswalk file is to facilitate merging crime data sets with other source data files. Analysts should be aware that other data files may use the part of or other name codes as the place codes. In such cases recoding values will be necessary to ensure the files merge correctly.

FILE STRUCTURE

The LAW ENFORCEMENT AGENCY IDENTIFIERS CROSSWALK [UNITED STATES], 2000 is available from the ICPSR in rectangular ASCII file format. There is one data file. The file contains 42 variables, 24,164 records, and each record is 728 characters long. A record contains information relevant to an individual police agency reporting entity.

SAS and SPSS data definition statements have been prepared to read and define the ASCII data file.

ICPSR PROCESSING INFORMATION

The data collection was processed according to standard ICPSR processing procedures. The data were checked for illegal of inconsistent code values which, when found, were recoded to missing data values. No consistency checks were performed.

FIPS AND UCR VARIABLE INFORMATION

State and County Codes

The UCR and FIPS coding schemes for states and counties are not the same. The crosswalk file lists both UCR and FIPS state and county codes for each agency. Thus an analyst is able to use whichever set of codes is more useful. There is no UCR place code that corresponds to the FIPS place code. Analysts need to be very careful when referring to state and county codes. Consistent codes need to be used when files are merged, or incorrect results will occur.

Population Data

The crosswalk file contains three population variables: the UCR population covered (UPOPCOV), the Bureau of the Census 2000 population estimate (CPOP) as contained in

the CSLLEA, and the population estimate for the FIPS place code (POP) as contained in the Bureau of the Census gazetteer files. In many instances these values are not the same. Minor differences are due mostly to the timing of when the population estimates were obtained by UCR and Census. However, there are many records that have substantial differences in the two population figures. Substantial differences are due to the different methods UCR and Census use to assign population estimates to a police agency.

The Bureau of the Census conducted the data collection for the CSLLEA 2000 under an agreement with the Bureau of Justice Statistics. Law enforcement agencies that serve a specific municipal, city, or county government were assigned the population within the geographic area of the government. In very few instances the agency was assigned the population of the state. In the CSLLEA the same population may be assigned to more than one police agency.

Within the UCR, a given population is assigned to only one law enforcement agency. This occurs in spite of the fact that jurisdictions often overlap. Consequently, UCR has several thousand agencies that have zero population assigned to them. For example, the UCR population covered variable has a value of zero for the University of Michigan Department of Public Safety (ORI: MI81903). That is because the U of M DPS, located in Ann Arbor, MI, has its population covered assigned to the city of Ann Arbor (ORI: MI81218). "Zero population" agencies along with county agencies are sources of major differences between UCR and Census population estimates.

County agencies will typically have a UCR population covered, but the figure will not equal the Census's population estimate. This is because the population has been assigned to other agencies. Ann Arbor, Michigan and Washtenaw County serve as an example.

POPULATION PER SOURCE

	UCR (UPOPCOV)	CENSUS (CPOP)		
Ann Arbor	110,581	114,024 (1)		
Washtenaw County	126,603	322,895 (2)		

- (1) The population figures for Ann Arbor are very similar. The difference is most likely related to when the estimates were received.
- (2) The figures for Washtenaw County are very different. The Census figure represents the entire county population. The UCR figure represents Washtenaw County minus Ann Arbor's population and minus any other populations assigned to other agencies. Thus the UCR county population figure represents the residual population of the county not specifically assigned to another agency/jurisdiction.

In addition to the population estimates contained in the CSLLEA and the UCR files, a population for the FIPS place code (POP) is also included. This is the Census Bureau population estimate for the specific place code. It is particularly useful for records that are not included in the CSLLEA such as state police county posts.

UCR State Abbreviations

The UCR ORI coding scheme was developed so that the first two digits were an alpha abbreviation for the State. That coding scheme was established before the U.S. Postal Service (USPS) introduced standardized two digit State abbreviations for postal purposes. These postal codes have since become international standards for a variety of purposes. Thus, in some instances the first two digits of the ORI code are different from the USPS code. For example, in Nebraska the ORI numbers lead with NE, whereas the USPS abbreviation is NB.

Updated Values

It is the intention of BJS and NACJD to periodically update the Crosswalk file. However, values may change in the intervening time. Infrequently, county codes change in both the UCR and FIPS systems. The contents of metropolitan statistical areas change with greater frequency. Users of the crosswalk file need to be aware that some records in this file may be out of date because of updated values in the source data.

RELATED PUBLICATION

Linking Uniform Crime Reporting Data to Other Datasets, A BJS Technical Report, outlines the contents and uses of the new Law Enforcement Agency Identifiers Crosswalk file. It includes additional information about the construction of the file and discusses future updates and improvements. The report is available on-line at http://www.ojp.usdoj.gov/bjs/abstract/lucrdod.htm

COUNTY COUNTY NAME

3 37 A35

BEG END

Data source: GID, FIPS 55

COUNTY is the name of the county that the agency is located in. County name is assigned first using the Governments Integrated Directory and then using the FIPS 55 file.

AGENCY AGENCY NAME

38 87 A50

Data source: CSLLEA, UCR

Agency name is assigned first using the CSLLEA, and then, for agencies not listed in the CSLLEA, from the UCR Program.

AGENCYID CENSUS 16 CHARACTER ID (STRING)

88 103 A16

Data source: CSLLEA

This variable is a 16 character string that uniquely identifies police agencies that are included in the CSLLEA conducted by the Census Bureau for the Bureau of Justice Statistics. The variable is stored as a string because some statistical packages do not correctly read integers 16 characters or greater. Only agencies included in the CSLLEA have values for this variable.

NAME VARIABLE LABEL COL COL FMT

ORI7 ORIGINATING AGENCY IDENTIFIER (7 CHAR) 104 110 A7

Data source: UCR, CSLLEA

The seven character ORI code is used to uniquely identify reporting entities within the UCR program. Some agencies included in the CSLLEA have an ORI code, but they may not participate in the UCR program. These agencies are listed in the crosswalk file with their ORI code but no other UCR variables.

AGENTYPE TYPE OF AGENCY

111 111 F1

BEG END

Data source: CSLLEA

Only agencies that are included in the CSLLEA have values for this variable.

- 1 Sheriff
- 2 County police
- 3 Municipal police
- 5 Primary state LE
- 6 Special police
- 7 Constable
- 8 Tribal
- 9 Regional police

GOVIDNU GOVERNMENT ID (NUMERIC)

112 120 F9

Data source: GID

The government ID is taken from the Governments Integrated Directory. It is used to identify local governments. It is not unique within the dataset because multiple police agencies can be created under the authority of a given government unit. State Government codes were added by using the census's two character state code and trailing zeroes. Indian tribes were assigned a government ID of 999999997.

FCOUNTY FIPS COUNTY CODE 189 191 F3

Data source: GID, FIPS 55

FIPS county codes are taken from either the Governments Integrated Directory or the FIPS 55 file.

999 M Undetermined

FPLACE FIPS PLACE CODE 192 196 F5

Data source: GID, FIPS 55

This is the numeric code that corresponds to the entity name identified in the place name variable (PLACENM). FIPS place codes are assigned first using the Governments Integrated Directory and then using the FIPS 55 file. For county agencies the FIPS place code is the three digit FIPS county code with a prefix of 99.

99999 M Undetermined

PLACENM PLACE NAME 197 248 A52

Data source: FIPS 55

The PLACENM variable contains the entity name, as listed in the FIPS 55 file, corresponding to the FIPS place code.

CLASSCD ENTITY CLASS CODE 249 250 A2

Data source: FIPS 55

The class code identifies the type of entity; the leading character is alphabetic; second character is blank or numeric. See Appendix IV for an explanation of class codes.

PARTOFCD ENTITY PART OF CODE 251 255 F5

Data source: FIPS 55

A valid entry for this variable indicates that the entity is either within the boundaries of another entity or, if obsolete, now is part of a new entity.

442 443 A2

Data source: UCR

This variable indicates the grouped population covered by the agency. Only agencies within the UCR program are assigned a population group code.

- 0 Possessions
- 1 All cities 250,000 or over
- 1A Cities 1,000,000 or over
- 1B Cities from 500,000 thru 999,000

UPOPCOV UCR POPULATION COVERED

444 452 F9

Data source: UCR

This variable indicates the population covered by the agency. Only agencies within the UCR program have values for this variable. The population listed here is meant to be that which is not covered by another agency. For example, the population covered by the Washtenaw County, MI State Police does not include the city of Ann Arbor, MI. Instead, Ann Arbor's population is assigned to the Ann Arbor Police Department. A population covered of zero indicates that other agencies have been assigned the entire population.

CPOP CSLLEA 2000 POPULATION

453 463 F11

Data source: CSLLEA

The population contained in the Census of State and Local Law Enforcement Agencies is an estimate by the Census Bureau for the geographic area as of April 2000. It is not the same as the UCR population covered variable. Only agencies in the CSLLEA 2000 have values for this variable.

Note: For state-wide agencies, the headquarters office is assigned the population of the entire state.

888888888 M Not applicable

NAME VARIABLE LABEL COL COL FMT

UCOVBY UCR COVERED BY AGENCY ORI 464 470 A7

Data source: UCR

The variable UCOVBY indicates that the police agency does not report data directly to the FBI. Rather the agency reports through (is covered by) another police agency. For example, a county will often submit a return which includes the crime data for a city within that county. The crime data for such a city is included in the county's totals. Agencies with a valid value in the UCOVBY variable may have directly reported to the FBI in the past, or they may report directly in the future. Only agencies within the UCR program will have values for this variable.

UMULTICO UCR MULTIPLE COUNTY FLAG

471 471 A1

Data source: UCR

A code of '*' indicates that the agency spans more than one county. Only agencies within the UCR program will have this field completed.

LAT LATITUDE 472 482 F11.6

Data source: Census gazetteer files

LAT is the latitude of the area identified by the FIPS place code.

LONG LONGITUDE 483 493 F11.6

Data source: Census gazetteer files

LONG is the longitude of the area identified by the FIPS place code.

POP POPULATION FOR FIPS PLACE CODE 494 502 F9

Data source: Census gazetteer files

POP is the population of the area identified by the FIPS place code. In many cases this is not the same population as indicated in the UCR population covered variable. In addition, it may be different from the values contained in the CPOP variable.

NAME	VARIABLE	LABEL	COL	COL	FMT
			BEG	END	

HOUSE TOTAL HOUSING UNITS

503 510 F8

Data source: Census gazetteer files

HOUSE is the number of housing units in the area identified by the FIPS place code.

MILES TOTAL AREA IN SQUARE MILES

511 523 F13.6

Data source: Census gazetteer files

MILES is the total area in square miles for the area identified by the FIPS place code.

ZIPCODE ZIP CODE (LOWEST)

524 528 N5

Data source: FIPS 55

This variable, taken from the FIPS 55 file, contains the lowest-numbered or only ZIP Code of a servicing post office corresponding to the FIPS place code.

ZIPRANGE ZIP CODE RANGE

529 530 N2

Data source: FIPS 55

If the entity is assigned more than one 5-digit sequential ZIP Code, the data represent the two rightmost digits of the highest-numbered ZIP Code of the set corresponding to the FIPS place code.

ADD1 ADDRESS LINE 1

531 575 A45

Data source: CSLLEA, UCR Program

Address variables 1 to 5 are assigned first using the Census of State and Local Law Enforcement Agencies (CSLLEA), and then, for agencies not listed in the CSLLEA, from the Uniform Crime Reporting (UCR) Program.

ADD2	ADDRESS LINE	2	576	620	A45
ADD3	ADDRESS LINE	3	621	665	A45

ADD5	ADDRESS LINE	5	711	719	A9

NAME VARIABLE LABEL COL COL FMT

HOCODE HEADQUARTERS LOCATION FIPS 720 727 F8

Data source: CSLLEA

A valid value for HQCODE indicates a record that represents a headquarters office of a state agency. Analysts may wish to treat these records differently from others. The value in HQCODE is the FIPS county and place codes concatenated as an 8 character field. The variables FCOUNTY and FPLACE have been recoded to 980 and 98000 respectively.

SOURCE SOURCE OF RECORD

728 728 F1

BEG END

The SOURCE variable indicates the source of each record in the crosswalk file. Each record in the file may have additional variables added to it from other data files (e.g., the GID, or FIPS 55 file).

Appendix IV Class Code System

The follow description of the class code system is extracted from chapter 5 of:

Federal Information Processing Standards Publication 55-3
1994 December 28
Specifications for
CODES FOR NAMED POPULATED PLACES, PRIMARY
COUNTY DIVISIONS, AND OTHER LOCATIONAL ENTITIES
OF THE UNITED STATES, PUERTO RICO, AND THE OUTLYING
AREAS

5. CLASS CODE SYSTEM

5.1Definition of Terms

The following definitions are provided to facilitate understanding of the class code system.

active: Refers to a governmental unit (county or statistically equivalent area ,minor civil division, consolidated city, or incorporated place) that exercises its legally constituted governmental functions and powers; see *inactive* and *nonfunctioning*.

Alaska Native Area: a) A legal entity recognized by the Federal Government pursuant to the Alaska Native Claims Settlement Act. These are the Alaska Native Regional Corporation (ANRC) and Alaska Native Village (ANV). Or a statistical entity that identifies the settled portion of the Alaska Native tribes, delineated for purposes of data presentation by or for the Census Bureau this is the Alaska Native Village statistical area (ANVSA). b) a legal entity recognized by the Federal Government pursuant to Alaska Native Claims settlement Act to conduct the business and nonprofit affairs for Alaska this is the Alaska Native Regional Corporation.

American Indian Area: a) A legal entity with specific boundaries established by treaty, statute, and/or executive order, over which a Federally recognized American Indian tribe has jurisdiction. This area is called an American Indian reservation, but includes entities with other designations such as pueblo, colony, and community; b)a legal entity for which lands are held in trust by the Federal Government for the use and benefit of a tribe or individual member of a tribe this is called trust land, either tribal or individual; c) a legal entity with specific boundaries established by state statute for a state-recognized American tribe this is called a state American Indian reservation; d) a statistical entity delineated for the purposes of data tabulation by or for the Census Bureau that delimits

the population and area over which one or more American Indian tribes lacking a reservation have jurisdiction and/or provide benefits and services to members of the tribe this is called a tribal jurisdictional statistical area in Oklahoma, and tribal designated statistical area in other states.

authoritative common name: A name in common use and approved by an authoritative body such as the U.S. Board on Geographic Names.

census county division (CCD):A statistical entity that serves as a primary county division in 21 States that do not have minor civil divisions (MCDs) or whose MCDs are not used for data presentation by the Census Bureau.

census designated place (CDP):A statistical entity that represents a named populated settlement, not within the limits of an incorporated place, that has locally delineated boundaries and is recognized by the Census Bureau in the data tabulations for the most recent decennial census; in Puerto Rico the equivalent of a CDP is called a comunidad or zona urbana.

census subarea: A statistical entity that serves as a primary county division in Alaska.

census subdistrict: A legally defined entity, established for statistical purposes, that serves as a primary county division in the Virgin Islands of the United States.

community: A populated place that is not an incorporated or census designated place of the same name; includes neighborhood areas within an incorporated or census designated place with a different name and all types of named settlements.

county equivalent: A primary division of a State or a State equivalent; other than a county; for example, a parish in Louisiana, a borough or census area in Alaska, or an independent city in Maryland, Missouri, Nevada, or Virginia.

facility: A locational entity, established as a site for designated activities but not primarily for habitation (even though on-site habitation may be necessary to the execution of the primary activities); for example, a college, hospital, military installation, national park, office building, or prison.

inactive: Refers to a governmental unit (county or statistically equivalent areas, minor civil division, consolidated city, or incorporated place that has legally constituted governmental functions and powers, but currently does not exercise them; see active and nonfunctioning.

incorporated place: A populated place that is a legal entity having legally defined boundaries and legally constituted governmental functions and powers; also serves as a primary county division in some States.

independent city: An incorporated place that is not legally part of a county or county equivalent and, therefore, also serves as a county equivalent; applies only to Maryland, Missouri, Nevada, and Virginia.

independent place: An incorporated place that is also a primary county division.

minor civil division (MCD):A legal entity that is a subdivision of a county or county equivalent, other than an incorporated place, established by appropriate State or local governmental authorities and recognized by the Census Bureau as a primary county division; for example, a township in Ohio, a town in Vermont, a magisterial district in Virginia. The Census Bureau recognizes MCDs in 28States, Puerto Rico, and in all the Outlying Areas and freely associated areas.

nonfunctioning: A legal entity (county, or statistically equivalent area, minor civil division, or incorporated place that does not have legally constituted governmental functions and powers and cannot have elected officials; see active and inactive.

nonplace: A term that modifies the set of county equivalents and primary county divisions so as to exclude from membership all incorporated places and census designated places.

populated place: A named geographic concentration of residential population; a populated place that is a legal entity is an incorporated place or consolidated city; a populated place that is a statistical entity is a census designated place (aldea or zona urbana in Puerto Rico); a populated place that is neither is a community.

primary county division: The principal territorial unit into which a county or county equivalent (except an independent city) is completely subdivided, without overlap; see census county division, census subarea, census subdistrict, incorporated place, minor civil division, and unorganized territory.

State equivalent: The District of Columbia, American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, Puerto Rico, United States Minor Outlying Islands, and the Virgin Islands of the United States; three freely associated states the Federated States of Micronesia, Republic of the Marshall Islands and the Republic of Palau, also are defined as State equivalents for this FIPS.

unorganized territory (UNORG): A statistical entity established within a portion of a county or county equivalent that is not subdivided into minor civil divisions or part of an incorporated place that is also a primary county division or in an independent city, for the purposes of data presentation of the Census Bureau; occurs only in those States that have minor civil divisions, and always serves as a primary county division.

5.2Entity Selection With the Aid of the Class Code

Each file entity record is assigned a 2-character class code that distinguishes the type of entity. The first character is alphabetic and identifies a class. The second character either is blank if a class has no subclasses, or is a digit from 1 to 9 that identifies a subclass. See Section 5.3.

legal entity: a geographic unit with legally defined boundaries established under Federal, State, or local law as a government unit or as an area for the administration of a governmental function.

statistical entity: a geographic unit established for the purposes of data presentation by the Census Bureau that has no legally defined boundaries or governmental function.

governmental unit: a geographic entity that has the ability to have elected officials and raise revenues through taxes; see active and inactive.

The primary function of the class code structure is to distinguish different types of entities, such as counties, primary county divisions, and populated places. These three types generally form a hierarchy; that is, a county (or county equivalent) will contain one or more primary county divisions, while a primary county division may include one or more populated places. Some populated places, however, also serve as primary county divisions, and a few also serve as county equivalents. Some are coextensive with their primary county divisions. For each of these types of entities, the class code structure distinguishes the type of entity, whether it has a special relationship to another type of entity, and whether it is a legal entity (active, inactive, or nonfunctioning entity), a statistical entity, or another type of locational entity. For example, among the primary county divisions, the active governmental units are identified by two subclasses in Class T; for populated places, the active governmental units are identified as incorporated places and distinguished by several of the subclasses in Class C.

The class code structure is extremely important in distinguishing entities that have the same or a similar name and may be located in the same county. Below is an example from the Michigan file:

Entity	Entity	County	County	Class
Code	Name	Code	Name	Code
51620	Marion (Township of)	029	Charlevoix	T1
51640	Marion (Township of)	093	Livingston	T1
51660	Marion	133	Osceola	C1
51680	Marion (Township of)	133	Osceola	T1
51700	Marion (Township of)	145	Saginaw	T1
51720	Marion (Township of)	151	Sanilac	T1
51740	Marion Springs	145	Saginaw	U6

There are six different entities with the same name of Marion (as determined by the six unique codes assigned to the records.) There also is an entity named Marion Springs. It is

important to the user to determine what entities should be selected. If only places are required, then the records with classes C1 and U6should be selected. If a further differentiation requires only legal incorporated places, then only the C1 record should be selected. If active minor civil divisions are specified then only the records with class T1 should be selected. Note that in Osceola County, there are two records with the name of Marion one a C1 incorporated place record and one a T1 active MCD record.

The importance of the same name applying to multiple records in the same county takes on more importance as the class codes contain information about the relationships between entities. As an example of the use of the class code indistinguishing between an incorporated place and a primary county division where the class code includes some determined relationship information between entity types, consider these data for two records in New York:

Entity	Entity	County	County	Class
Code	Name	Code	Name	Code
30521	Green Island	001	Albany	C1
30532	Green Island (Town of)	001	Albany	T5

The first record is for an active incorporated place, identified by its class code C1, while the second record is an active primary county division, an MCD, denoted by its class code of T5. C1 indicates that the incorporated place is included in a primary county division, T5 indicates that the MCD is coextensive with an incorporated place, and the county name shows that both are located in the same county. In this case, both governmental units are coextensive with another entity; however, it is not explicit from the class codes that the coextensivity specifically involves these two entities. Because neither the place name nor the county location serves to distinguish the two units, the user must be aware of the geographic relationships in New York, and the application must be very clear as to whether the incorporated place, the MCD, or both are to be selected, with the possibility that there may be geographic duplication.

An apparently similar situation exists in Wisconsin, as shown in the following example:

Entity	Entity	County	County	Class
Code	Name	Code	Name	Code
48000	Madison	025	Dane	C5
48025	Madison (Town of)	025	Dane	T1

In this case, the two entities cannot be coextensive. This is revealed by the class codes C5 and T1. C5 identifies an independent incorporated place that is also a primary county division, and T1 identifies an active minor civil divisiont hat is not coextensive with an incorporated place. Use of the class codes identifies that the two entities exist separately from one another, and this could be the basis for selecting one or the other,

A slightly different situation exists with the following two records in Massachusetts:

Entity	Entity	County	County	Class
Code	Name	Code	Name	Code
09175	Brookline (Town of	021	Norfolk	T1
09210	Brookline	021	Norfolk	U1

The class code T1 identifies the first record as an active MCD. The class code of the second record, U1, identifies the entity as a CDP that has an authoritative common name for its population. Again, neither the place name nor county name is of help in selecting the appropriate entity. However, if a specific application required the selection of a populated place (regardless of its governmental status), the second record (with class code U1) should be selected; if the application required the selection of an active governmental unit or a primary county division, the first record (with class code T1) should be chosen.

The class code structure also is useful to distinguish alternate names for the same incorporated place. The Census Bureau identifies each incorporated place by its legal corporate name, as reported by State and local officials. In some instances, the place is commonly known by another name that may be very similar. For example, consider this pair of records in Alabama.

Entity Code	•	-	County Name	
55824 55848	Oakhill (corporate name Oak Hill) Oak Hill (corporate name for Oakl			

These records display alternate names for the same entity. The record with class code C1 is the legal corporate name, and the name used by the Census Bureau. The record with class code C4 represents an alternate name. Although the alternate name may not be official, it nevertheless may be an authoritative common name. The record for the entry with the legal name provides the user with codes for its metropolitan area (if any) and congressional district as well as across-reference to the Census Bureau Code; the C4 record does not. For any file application, the user must determine in advance whether the legal name or the alternate common name is to be used selected based on assigned class codes. If such a determination is not made, both records may appear in the data collected and, as a result, an erroneous duplication of data may be the result. Note that for both entities, the code for the other entity appears in the Other Name Code field.

The class code can be useful in selecting a portion of a single entity with a particular status, as shown by this example in California:

Entity	Entity	County	County	Class

Code
M2
ngeles M1 ernadino M1
J

In this example, Edwards Air Force Base is both a military facility and a CDP in Kern County, as shown by the class code M2. That is where most or all of the on-base population is located. However, the base extends into Los Angeles and San Bernadino Counties, but is not a CDP in those counties, as indicated by the class code M1. If the entire base is to be identified, all three counties must be listed, but if only the populated place is of concern, only the record with a class code of MZ in Kern County should be selected.

A similar situation occurs in this example in Ohio:

Entity	Entity	County	County	Class
Code	Name	Code	Name	Code
36918	Hunting Valley	035 055	Cuyahoga Geauga	C5 C1

Hunting Valley is located in two counties. It serves as a primary county division in Cuyahoga County, as indicated by class code C5, but it is dependent within a township in Geauga County, specified by class code C1. If only primary county divisions are desired in an application, only Cuyahoga County should be listed, whereas if the full extent of the incorporated place is required, then all records with the SAMP entity code must be specified.

5.3Class Code Structure

Each class is included in one of five major groups: populated places not associated with facilities; counties and county equivalents, primary county divisions, and American Indian areas and Alaska Native areas; facilities other than communications and transportation; communications and transportation facilities; and obsolete or incorrect names. The groups identify the distinctions among populated settlements, areally larger units that tend not to represent a cluster of population, a variety of facilities, and the inevitable other category. Some class codes are new for FIPS 55-3, and some categories recognized in previous versions of FIPS 55 have been dropped or revised; these changes are noted in the text.

The subclasses provide the ability to relate an entity to a class other than its own. This ability is useful because a number of entities serve in more than one capacity. For example, a military base may also serve as a commercial airport, and an American Indian reservation may also serve as a primary county division. Similarly, it is useful to identify close relationships through this method. A number of subclasses identify entities in

different classes that are coextensive or approximately so, such as a place that is coextensive with a minor civil division or an Alaska Native Village statistical area. There also are subclasses that identify alternate names for the same entity. The groups, classes, and subclasses are described below.

5.3.1 Group 1: Populated Places Not Associated With Facilities

Class C: Incorporated Places

Names appearing in this class are those recognized by the U.S. Bureau of the Census based on information provided by State, county, and local governments. Alternate authoritative common names recognized by the U.S. Board on Geographic Names are recorded in subclass C4.

C1:Identifies an active incorporated place that is not also recognized as an Alaska Native Village statistical area, and does not also serve as a primary county division; that is, it is included in and is part of a primary county division. For example, the city of Hammond, Indiana is within and part of North township; the city of Austin, Texas is within and part of several census county divisions in several counties; Hammond and Austin are coded C1.

C2:Identifies an incorporated place that also serves as a primary county division because, although the place is coextensive with a minor civil division (MCD), the Census Bureau, in agreement with State officials, does not recognize the MCD for presenting census data because the MCD is a nonfunctioning entity; applies to Iowa and Ohio only. For example, the city of Dubuque, Iowa is coextensive with Julien township, which does not function as a governmental unit and may not be well-known even to local residents; the city is assigned code C2, and the township, Z8. This subclass is new for FIPS 55-3. Also see subclass C5.

C3: Identifies a consolidated city; that is, an incorporated place that has consolidated its governmental functions with a county or MCD, but continues to include other incorporated places that are legally part of the consolidated government. For example, the city of Columbus, Georgia is consolidated with Muscogee County, which continues to exist as a nonfunctioning legal entity in the State; however, the town of Bibb City continues to exist as a separate active incorporated place within the consolidated government and, therefore, Columbus is treated as a consolidated city. At the time of publication, there are seven consolidated cities in the United States: Athens-Clarke County, Georgia; Butte-Silver Bow, Montana; Columbus, Georgia; Indiana polis, Indiana; Jacksonville, Florida; Milford, Connecticut; and Nashville-Davidson, Tennessee. The subclass is new for FIPS 55-3.

C4:Identifies an alternate authoritative common name of any member of the other subclasses of Class C. The entity code of the legal name is referenced in the ``Other Name Code" of the record, and in the entry for the legal name, the Other

Name Code references the alternate. For example, the entity in California whose legal name is San Buenaventura (subclass C1) is commonly known as Ventura, which is coded C4.

C5:Identifies an incorporated place that also serves as a primary county division; that is, it is not included in any adjacent primary county division of class T or Z. For example, Boston, MA, is legally a primary division of the county and recognized as an incorporated place and, therefore, is coded C5. Also see subclass C2.

C6:Identifies an incorporated place that is coincident with or approximates an Alaska Native Village statistical area. The Other Name Code references the Alaska Native Village statistical area; see subclass E6.

C7:Identifies an independent city. At the time of publication, independent cities exist in only four States: Maryland (Baltimore City), Nevada (Carson City), Missouri (St Louis City), and Virginia (41 cities). These cities also serve as county equivalents, and all but Carson City also serve as primary county divisions.

C8:Identifies the portion of a consolidated city that is not within another incorporated place; see subclass C3. The Census Bureau identifies these nonfunctioning entities by taking the name of the consolidated city and appending in parentheses the word remainder. For example, Columbus (remainder) identifies the portion of the Columbus, Georgia consolidated city that is not also in Bibb City. This subclass is new for FIPS 55-3.

C9:Identifies an inactive or nonfunctioning incorporated place.

Class U: Populated (Community) Places (Except Those Associated with Facilities)

U1: Identifies a census designated place (CDP) with a name identical to the authoritative common name that describes essentially the same population. Also see subclass M2.

U2: Identifies a CDP with a name not identical to an authoritative common name of essentially the same area. If there is an alternate authoritative common name, it is referenced in the Other Name Code field. For example, Suitland-Silver Hill, Maryland is the name of a locally delineated CDP recognized by the Census Bureau which is a combination of two communities Suitland and Silver Hilland, therefore, because it is not the authoritative name of the area, is coded U2; Sierra Vista Southeast, Arizona is a CDP that includes the built-up area adjoining the city of Sierra Vista on the southeast, but is not an authoritative name for that area and, therefore, is coded U2. Also see subclass M2.

U3: Identifies (a) an alternate, authoritative common name of a population essentially described by a specific CDP with a different name (the Other Name Code references the CDP), or (b) a community wholly or substantially within the boundaries of a CDP with a different name (the Part of Code references the CDP). For example, Silver Hill and Suitland are coded U3 and cross-referenced to the CDP of Suitland-Silver Hill (see subclass U2).

U4: Identifies a populated place wholly or substantially within the boundaries of an incorporated place with a different name; the Part of Code identifies the incorporated place. For example, Harlem and Greenwich Village, which are part of New York city, and Hollywood, which is part of Los Angeles, California, are coded U4.

U5: Dropped. Only one place the CDP of Arlington, Virginia was in this subclass in FIPS PUB 95-2; it has been recoded as U1 as a place and as Z3 as a subclass in FIPS 55-3 as a county subdivision.

U6: Identifies a populated place located wholly or substantially outside the boundaries of any incorporated place or CDP with an authoritative common name recognized by the U.S. Geological Survey.

U8: Identifies a populated place located wholly or substantially outside the boundaries of an incorporated place or CDP but whose name has not been verified as authoritative by the U.S. Geological Survey.

U9: Identifies a CDP that is coincident with or approximates the area of an Alaska Native Village statistical area. The Other Name Code references the Alaska Native Village statistical area; see subclass E2. This subclass is new for FIPS 55-3.

Class D: American Indian Areas

D1: Identifies a federally recognized American Indian reservation and its associated trust land that does not also serve as a primary county division.

D2: Identifies a federally recognized American Indian reservation that exists in a single county and also serves as a primary county division (applies only in Maine and New York). This subclass is new for FIPS 55-3.

D3: Identifies a federally recognized American Indian tribal government that holds off-reservation property in trust trust land for a tribe or individual member(s) of a tribe, and the trust land is not associated with a specific American Indian reservation. This subclass is new for FIPS 55-3.

D4: Identifies a State-recognized American Indian reservation that does not also serve as a primary county division.

D5: Identifies a State-recognized American Indian reservation that exists in a single county and also serves as a primary county division (applies only to New York).

D6: Identifies a statistical entity delineated for the Census Bureau to delimit an area containing the American Indian population over which a federally or Staterecognized American Indian tribe not having a recognized reservation has jurisdiction (tribal jurisdiction statistical area TJSA in Oklahoma) and/or provides benefits and services to its members (tribal designated statistical area TDSA in other States). This subclass is new for FIPS 55-3.

D7: Identifies an administrative division of an American Indian tribal government. For example, the chapters of the Navajo Nation. This subclass is new for FIPS 55-3.

D8: Identifies an alternate authoritative common name of any member of the other subclasses of Class D. The place code of the legal name is referenced in the ``Other Name Code" of the record, and in the entry for the legal name, the ``Other Name Code" references the alternate. This subclass is new for FIPS 55-3.

D9: Dropped as a subclass in FIPS 55-3. The entity represented by this subclass the Oklahoma Historic Reservation Area, which was allocated to 63 counties has been deleted and replaced by the TJSAs identified as part of subclass D6.

Class E: Alaska Native Areas

Alaska Native Villages (ANVs) are legal entities that may not have legally established boundaries. The Census Bureau, in cooperation with Alaska Nativeo fficials, has delineated boundaries that identify the settled portion of most Alaska Native Village tribal communities them from the legal entities they represent, these statistical entities are referred to as Alaska Native Village statistical areas (ANVSAs). The FIPS entity code scheme assigns a single code to represent both the legal ANV and ANVSA which designations appear in parentheses after the legal entity name. Alaska Native Regional Corporations (ANRCs) are legal entities with boundaries determined in the Alaska Native Claims Settlement Act to conduct the business and nonprofit affairs of Alaska Natives and their communities.

E1: Identifies an ANV/ANVSA where the ANVSA boundaries do not coincide with or approximate an incorporated place or a CDP.

E2: Identifies an ANV/ANVSA where the ANVSA boundaries coincide with or approximate a CDP. The Other Name Code identifies the CDP; see subclass U9.

E6: Identifies an ANV/ANVSA where the ANVSA boundaries coincide with or approximate an incorporated place. The Other Name Code identifies the incorporated place; see subclass C6.

E7: Identifies an ANRC, an area established by the Alaska Native Claims Settlement Act; twelve ANRCs cover all of the State of Alaska except the Annette Islands Reserve, an American Indian reservation a thirteenth ANRC is for Alaska Natives residing outside of Alaska and this ANRC is not included in FIPS 55. This subclass is new for FIPS 55-3.

5.3.2Group 2: Counties, and County Equivalents Primary County Divisions, American Indian Areas, and Alaska Native Areas

Class H: Counties and County Equivalents

Class H includes all the primary divisions of a state or state equivalent usually called counties, but also includes borough and census areas in Alaska, parishes in Louisiana, municipios in Puerto Rico, and districts, islands, and municipalities in the Outlying Areas. The class does not include independent cities which are classified as class C7.

H1: Identifies an active county or county equivalent that does not qualify under subclass C7 or H6.

H4: Identifies an inactive or nonfunctioning county or county equivalent that does not qualify under subclass H6.

H5: Dropped as a subclass in FIPS 55-3. The 17 entities recorded in this subclass in FIPS 55-2, which identified inactive or nonfunctioning counties or county equivalents coextensive with a single primary county division, have been reassigned to code subclass H4 or H6, as appropriate.

H6: Identifies a county or county equivalent that is areally coextensive or governmentally consolidated with an incorporated place, part of an incorporated place (applies only to New York City), or a consolidated city (see subclass C3). The Other Name Code of the record references the name of the incorporated place or consolidated city. (The incorporated place serves as the active governmental unit.)

Class T: Active Minor Civil Divisions

T1: Identifies an active minor civil division (MCD) that is not coextensive with an incorporated place.

T2: Dropped as a subclass in FIPS 55-3. The entities in this subclass in FIPS 55-2, which identified active MCDs coextensive with a census designated place (CDP), have been assigned to subclass T1.

T3: Dropped as a subclass in FIPS 55-3. The entities in this subclass in FIPS 55-2, which identified active MCDs not coextensive with a CDP or incorporated place but including a populated place of the same name, have been assigned to subclass T1.

T5: Identifies an active MCD that is coextensive with an incorporated place. (The incorporated place usually has the same name as the MCD, and usually the officials of the incorporated place administer the governmental functions of the MCD.)

Class Z: Inactive or Nonfunctioning Primary County Divisions

Z1: Identifies an inactive or nonfunctioning minor civil division (MCD) recognized as a primary county division by the Census Bureau, such as the townships in Arkansas and North Carolina and the magisterial districts in Virginia and West Virginia.

Z2: Dropped as a subclass in FIPS 55-3. The 27 entities recorded in this subclass in FIPS 55-2, which identified unorganized territories (unorgs.) that were coextensive with a single disorganized MCD or member of subclass Z4, have been assigned to subclass Z3.

Z3: Identifies a unorg. established as an MCD equivalent by the Census Bureau. Some unorgs. may be coextensive with one or more disorganized MCDs and/or members of subclass Z4, or may include (but not be coextensive with) one or more such members. Subclass Z3 also identifies a primary county division that duplicates the county entry (applies only to Arlington County, Virginia).

Z4:Identifies a nonfunctioning or disorganized township or similar entity not recognized as an MCD by the Census Bureau; must be either coextensive with or included in an unorg., such as the survey townships in Maine (numbered in the 90000 series). If coextensive, the Other Name Code identifies a member of subclass Z3; if included, the Part of Code identifies a member of subclass Z3.

Z5: Identifies a census county division (in 21 States), census subarea (Alaska), or census subdistrict (Virgin Islands of the United States).

Z6: Identifies a sub-MCD in Puerto Rico (subbarrio) and the Federated States of Micronesia (a munic ipal district). This subclass is new for FIPS 55-3.

Z7: Identifies an independent incorporated place that serves as a primary county division in Iowa, North Carolina, and in counties containing only nonfunctioning MCDs in Nebraska. These entities are coded as places, but also as nonfunctioning primary county divisions numbered in the 90000 series in order to maintain their alphabetic sequence within the nonfunctioning MCD's in these States. This subclass is new for FIPS 55-3. Also see subclass C5.

Z8: Identifies a legally existing MCD that is coextensive with an incorporated place but not recognized by the Census Bureau (applies only in Iowa and Ohio); see subclass C2. This subclass is new for FIPS 55-3.

5.3.3Group 3: Facilities, Except Communications and Transportation

Class G: Nongovernment Facilities

This class comprising subclasses G1 (shopping center or amusement part), G3(health care or geriatric care facility), G4 (an area of natural preservation or significant cultural and historic significance), G5 (a stockyard, storage facility, or industrial manufacturing or continuous-processing facility other than a utility), G6 (a religious or educational facility, research laboratory, or testing facility), G7 (an energy generation facility or other utility), G8(an executive or administrative facility), and G9 (any other type of nongovernment facility, not elsewhere classified)has been dropped from FIPS 55-3and the records deleted because no source was available to make the information complete or keep it current.

Class M: Federal Facilities

M1: Identifies an installation of the U.S. Department of Defense or of any branch thereof, or of the U.S. Coast Guard, regardless of purpose of function of the installation; does not identify an installation or part thereof that qualifies under subclass M2 or A1.

M2: Identifies an installation (or part of an installation) that qualifies under subclass M1 and has been reported by the Census Bureau as a CDP.

M3: Identifies an installation of the U.S. Veterans Administration or other non-Defense Department health care, hospital, rehabilitation, or geriatric care facility.

M4: Identifies a unit of the national park system (including areas known by other designations such as National Monuments, National Historic Sites, and so forth) managed by the National Park Service.

M5: Dropped as a subclass in FIPS 55-3. The three Federal correctional facilities recorded in this subclass in FIPS 55-2 have been assigned to subclass M9.

M6: Dropped as a subclass in FIPS 55-3. The 13 non-Defense Department, non-Coast Guard educational and training facilities, research laboratories, or testing stations, or launch, monitoring, or control installations of the National Aeronautics and Space Administration recorded in FIPS 55-2 in this subclass have been assigned to subclass M9.

M7: Dropped as a subclass in FIPS 55-3. The one energy generation or fuel production facility recorded in this subclass in FIPS 55-2 has been deleted because the information is neither complete nor current.

M8: Dropped as a subclass in FIPS 55-3. The two executive, legislative, judicial, or administrative offices recorded in this subclass in FIPS 55-2 have been deleted because the information is neither complete nor current.

M9: Identifies a Federal facility not elsewhere classified.

Class N: State, Local, and International Government Facilities

N1: Identifies a National Guard or other public safety facility not qualifying under subclass A1.

N3: Dropped as a subclass in FIPS 55-3. The 23 health care, geriatric care, or veterans facilities recorded in this subclass in FIPS 55-2 have been deleted because the information is neither complete nor current.

N4: Dropped as a subclass in FIPS 55-3. The 10 State parks and significant cultural or historic sites recorded in this subclass in FIPS 55-2 have been deleted because the information is neither complete nor current.

N5: Dropped as a subclass in FIPS 55-3. The 48 State and local correctional facilities recorded in this subclass in FIPS 55-2 have been assigned to code N9.

N6: Dropped as a subclass in FIPS 55-3. The 42 educational facilities, research laboratories, and testing stations recorded in this subclass in FIPS 55-2 have been deleted because the information is neither complete nor current.

N7: Dropped as a subclass in FIPS 55-3. The eight energy generation facilities and other utilities recorded in this subclass in FIPS 55-2 have been deleted because the information is neither complete nor current.

N8: Dropped as a subclass in FIPS 55-3. The four executive, legislative, judicial, and administrative facilities recorded in this subclass in FIPS 55-2 have been deleted because the information is neither complete nor current.

N9: Identifies any other State, local, or international government installation not elsewhere classified.

5.3.4Group 4: Communications and Transportation Facilities

Class A: Airports

A1: Identifies an airport that receives regularly scheduled commercial flights and also serves as a military or Coast Guard installation.

A2: Dropped as a subclass in FIPS 55-3. This subclass an airport that receives regularly scheduled commercial flights, serves as a military or U.S. Coast Guard installation, and is a CDP category is obsolete, and the three airports recorded in this subclass in FIPS 55-2, have been assigned to subclass A1 or M2, as appropriate.

A3: Identifies an airport that receives regularly scheduled commercial flights and does not serve as a military or Coast Guard installation.

A4: Identifies an airport that does not receive regularly scheduled commercial flights and does not serve as a military or Coast Guard installation.

A5: Dropped as a subclass in FIPS 55-3. This subclass an airport not meeting Federal Aviation Administration safety regulation FAR 139 and not serving as a U.S. military or Coast Guard installation is obsolete, and the 15 airports recorded in this subclass in FIPS 55-2 have been assigned to subclass A3 or A4, as appropriate.

Class B:Post Offices Not Corresponding to Other Locational Entities

Post office names identified in this class are only those that do not identify entities included in another class; for example, Franklin D. Roosevelt is a postal station in New York city. The entity may be cross-referenced to the place in which it is located in the Part of Code field. There are no subclasses.

Class S: Surface Transportation Facilities

This class comprising facilities such as stations, depots, docks, loading and unloading points, switching points, spurs, sidings, junctions, and yards has been dropped as a class in FIPS 55-3 because the information is neither complete nor current. The two entities recorded in the class in FIPS 55-2 have been deleted. There were no subclasses.

5.3.5Group 5: Obsolete or Incorrect Names

Class X: Obsolete or Incorrect Names or Entities

The code of a correct replacement, if any, is given in the Other Name Code and Part of Code fields; the incorrect or obsolete name may be referenced in same cases from the Other Name Code of the replacement.

X: Dropped as a subclass in FIPS 55-3. The entities recorded in FIPS 55-2 as X with no subclassno information available have been assigned to a redefined subclass X3.

X1: Dropped as a subclass in FIPS 55-3. There were no entities in this subclass identifying entities abolished and not absorbed by another entity recorded in FIPS 55-2.

X2: Identifies entities whose names have been changed and are not appropriate in any other subclass; the new name is referenced by the Other Name Code.

X3: Identifies entities whose names are incorrect or less preferred, and are not appropriate in any other (sub)class, or entities for which more specific information that would permit assignment to an appropriate (sub)class is not available; the correct or preferred name, where known, is referenced by the Other Name Code.

X4: Identifies entities absorbed by one or more surviving entities; if one surviving entity, it is referenced by the Other Name Code; if two surviving entities, they are referenced by the Part of Code and the Other Name Code, if more than two surviving entities the Part of Code and Other Name Code reference the surviving entities with the two largest proportions of the original entity.

X5: Dropped as a subclass in FIPS 55-3. The four entities recorded in this subclass in FIPS 55-2, which identified entities absorbed by more than one surviving entity, have been assigned to a redefined subclass X4.

X6: Dropped as a subclass in FIPS 55-3. This subclass, identifying entities that may continue to exist but dropped as not pertinent, is not appropriate; the entities recorded in this subclass in FIPS 55-2 have been assigned to subclass X3.
